To whom it may concern

It is my distinct honor and privilege to write this letter in support of Reza Agahian as you consider a Lab Design and Construction Project for your enterprise or institution.

I have had the pleasure of working with Reza on several projects over the past 20 years, and the word that best describes him is professional. His recommendations and proposals are consistently reliable — leveraging his vast knowledge, attention to detail, creativity, and perspective, he has an exceptional ability to uncover the true needs of the client and translate them into world-class spaces delivered on time and within budget.

To achieve these outcomes, Reza demonstrates an almost mythical capacity for hard work, leaving no stone unturned in his pursuit of solutions that balance sometimes competing requirements. Even in high-pressure situations, he maintains composure and consistently presents himself as a trusted ally—someone who champions the interests of the client and earns their confidence.

Reza is equally effective in his interactions with external suppliers. He speaks their language, earns their respect, and makes it clear that the client's needs are paramount. While he understands the pressures suppliers face, he encourages them to avoid shortcuts and instead collaborate creatively to meet their commitments. They see him as a partner, not an adversary—perhaps the highest compliment one can give a Project Manager.

I have consistently advocated for Reza Agahian to be our first choice for Lab Design and Construction Project Management, and I have never regretted that decision. Working with him gives me complete confidence that we are supported by the very best. I would gladly work with him again on any future project.

Please don't hesitate to contact me if you have any further questions.

Sincerely yours,

A handwritten signature in black ink, appearing to read "E. F. Berliner".

Edward F. Berliner, Ph.D.
Dean of Science Management
Clinical Professor of Physics
